

VoIP Off-Net Cost Management solution from MDSL

Winner of the 2010 AOTMP Innovation of the Year Award

Maximize ROI On Your VoIP Investment

This award-winning solution from MDSL optimizes your VoIP network by clearly identifying, validating and allocating the costs of off-net calls routed via the Public Switched Telephone Network (PSTN).

Now you can reconcile VoIP data and public telephone call details easily, provide users with end-to-end costs, enjoy greater visibility and insight into off-net usage patterns and accurately chargeback business units.
